County Ditch 4

In 2010 the County Board approved a repair petition to County Ditch 4 (Petition 2010-007 approved by Resolution 2010-02-09-01). This resulted in cleaning a significant portion of the open ditch in Section 29 of Dovray Township. In order to avoid impacting the wetland in the Northwest Quarter (NW ¼) of the section, the clean out stopped 250' southeast (of the wetland). The county was approved by the DNR to install a concrete hog slat weir at the basin to permanently reestablish the outlet elevation at 1482.00 mean sea level. The project was completed during 2012. In 2013 the DNR had Bolton & Menk, Inc. check the elevations and found they were approximately 4" lower than they should be. The slats were either installed too low or have settled.

It was moved by Moline, seconded by Jens and passed to approve to lift the slots up set them at the right elevation put gravel underneath and put them back on county ditch 4 (Petition 2010-007 approved by Resolution 2010-02-09-01).
